

MA. CHEY CHENEB R. BICO

Entry-Level Software Developer | Web & Mobile Application Development
Imus City, Cavite | +63 927 828 0457 | mccbico.dev@gmail.com
Web Portfolio: mccbico.github.io | linkedin.com/in/mccbico

SUMMARY

Computer Engineer with experience in software, web, and mobile application development. Skilled in JavaScript, ReactJS, HTML, CSS, and Python, with hands-on experience building responsive, user-focused web interfaces through academic and industry projects. Strong foundation in application development, system design, and database management, complemented by a passion for creating intuitive digital experiences.

EDUCATION

Technological Institute of the Philippines
Bachelor of Science in Computer Engineering

Manila, Metro Manila
May 2023

EXPERIENCE

Ramcar Technology Incorporated
Machine Learning Intern (Project-Based)

Sta. Maria, Bulacan
Feb 2023 – Jul 2023

- Supported machine learning project development through dataset preparation, validation, and quality checking.
- Prepared and organized project data to support development, testing, and evaluation workflows.
- Assisted in Python-based model testing, performance evaluation, and documentation of results.
- Conducted data quality checks to support reliable model development workflows.

TECHNICAL PROJECTS

ALERTFIRE: Fire Classification and Intensity Analysis Using YOLOv5-Based Vision

TIP - Manila
2023

Application Developer

- Built an Android Studio application for real-time fire monitoring and detection.
- Assisted with system testing, evaluation, and deployment validation.
- Supported integration, testing, and validation of a YOLOv5-based fire detection system achieving 91.67% precision.
- Annotated and validated 1,000 fire-related images from an 8,500-image dataset.

DamaKita: A Bilingual Sentiment Analysis of Philippine Feminism Using NLP

TIP - Manila
2022

Project Lead & Web Developer

- Led a 5-member team in developing a bilingual sentiment analysis system for Filipino and English text.
- Processed and prepared text datasets through cleaning and preprocessing techniques.
- Developed responsive web interfaces using HTML, CSS, Bootstrap, and JavaScript.
- Integrated sentiment analysis features into a web-based classification application.

SKILLS

Programming: Python, Java, JavaScript, C++

Web Development: ReactJS, HTML, CSS, Bootstrap

Mobile Development: Android Studio, Java, Firebase (Android)

Database: MySQL, PostgreSQL

Tools: Git, GitHub, Visual Studio Code

Others: Adobe Creative Suite, Microsoft Office

ADDITIONAL INFORMATION

Leadership: Public Relations Officer, Computer Engineering Department Student Council (2021–2022)

Awards: DOST-SEI Undergraduate RA 7687 Scholarship Awardee (2019)
